

Office of the Secretary, USDA

§ 12.2

- 12.31 On-site wetland identification criteria.
- 12.32 Converted wetland identification criteria.
- 12.33 Use of wetland and converted wetland.
- 12.34 Paperwork Reduction Act assigned number.

AUTHORITY: 16 U.S.C. 3801 *et seq.*

SOURCE: 61 FR 47025, Sept. 6, 1996, unless otherwise noted.

Subpart A—General Provisions

§ 12.1 General.

(a) *Scope.* This part sets forth the terms and conditions under which a person who produces an agricultural commodity on highly erodible land or designates such land for conservation use, plants an agricultural commodity on a converted wetland, or converts a wetland shall be determined to be ineligible for certain benefits provided by the United States Department of Agriculture (USDA) and agencies and instrumentalities of USDA.

(b) *Purpose.* The purpose of the provisions of this part are to remove certain incentives for persons to produce agricultural commodities on highly erodible land or converted wetland and to thereby—

- (1) Reduce soil loss due to wind and water erosion;
- (2) Protect the Nation's long-term capability to produce food and fiber;
- (3) Reduce sedimentation and improve water quality; and
- (4) Assist in preserving the functions and values of the Nation's wetlands.

§ 12.2 Definitions.

(a) *General.* The following definitions shall be applicable for the purposes of this part:

Agricultural commodity means any crop planted and produced by annual tilling of the soil, including tilling by one-trip planters, or sugarcane.

CCC means the Commodity Credit Corporation, a wholly-owned government corporation within USDA organized under the provisions of 15 U.S.C. 714 *et seq.*

Conservation District (CD) means a subdivision of a State or local government organized pursuant to the applicable law to develop and implement soil and water conservation activities or programs.

Conservation plan means the document that—

(1) Applies to highly erodible cropland;

(2) Describes the conservation system applicable to the highly erodible cropland and describes the decisions of the person with respect to location, land use, tillage systems, and conservation treatment measures and schedules; and

(3) Is approved by the local soil conservation district in consultation with the local committees established under section 8(b)(5) of the Soil Conservation and Domestic Allotment Act (16 U.S.C. 590h(b)(5)) and the Natural Resources Conservation Service (NRCS) for purposes of compliance with this part.

Conservation system means a combination of one or more conservation measures or management practices that are—

(1) Based on local resource conditions, available conservation technology, and the standards and guidelines contained in the NRCS field office technical guides (available from NRCS State offices); and

(2) Designed for purposes of this part to achieve, in a cost-effective and technically practicable manner, a substantial reduction in soil erosion or a substantial improvement in soil conditions on a field or group of fields containing highly erodible cropland when compared to the level of erosion or soil conditions that existed before the application of the conservation measures and management practices.

Conservation use or set aside means cropland that is designated as conservation-use acreage, set aside, or other similar designation for the purpose of fulfilling provisions under any acreage-limitation or land-diversion program administered by the Secretary of Agriculture requiring that the producer devote a specified acreage to conservation or other non-crop production uses.

Creation of a wetland means the development of the hydrologic, geochemical, and biological components necessary to support and maintain a wetland where a wetland did not previously exist. Any wetland established on a non-hydric soil will be considered a created wetland.
